Template

# Customer experience journey map

Use this framework to better understand customer needs, motivations, and obstacles by illustrating a key scenario or process from start to finish. When possible, use this map to document and summarize interviews and observations with real people rather than relying on your hunches or assumptions.

## Document an existing experience

Narrow your focus to a specific scenario or process within an existing product or service. In the **Steps** row, document the step-by-step process someone typically experiences, then add detail to each of the other rows.

SCENARIO

**Browsing, booking, attending, and rating a local city tour**

### Entice

How does someone initially become aware of this process?

### Enter

What do people experience as they begin the process?

### Engage

In the core moments in the process, what happens?

### Exit

What do people typically experience as the process finishes?

### Extend

What happens after the experience is over?

### Steps

What does the person (or group) typically experience?

| Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|
| Easy to initialize; Cost-efficient; Eco-friendly; Easy to manipulate | Effective planning; Prioritization of tasking; Battery gets zeal from photovoltaic cell; Battery existence is high | Feasible sensors; Signify to engineman; Overhaul the flips of track; Easy to sense the flips in track | Economical with prosperity; Saves more time and energy | Shares feedback; More investment; Avoid railway accidents; Zero waste product |

### Interactions

What interactions do they have at each step along the way?

- **People:** Who do they see or talk to?
- **Places:** Where are they?
- **Things:** What digital touchpoints or physical objects would they use?

| Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|
| Probable E-booking; Feasible in metropolitan cities; Associate with company owner | Document validation; Passenger confirmation; Scrutinize the break system | Sensor synchronization; Traffic awareness; Sensor maintenance; Transformation of signals | Reach at appropriate time; Safe journey; Problem free network | Quick journey; Redundancy of error; Passenger flow |

### Goals & motivations

At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")

| Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|
| Avoid signal loss → Avoid accidents; Avoid error in break system | Earlier problem detection; Affordable cost; To provide safe and secure journey | Emergency break systems; Manage the outcomes; Quick communication with admin; Faster signal transmission | Compact size; Easy to replace; Affordable service | Increase passenger satisfaction; Reduced downtime; Automatic manipulation using sensors |

### Positive moments

What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?

| Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|
| Signify the data immediately to admin; Rest assure journey is safe; Secured travelling | Collision of rail can be avoided; Reduced property damage; Pollution free | Free to handle; Bulk cargo transport; Low fuel consumption; Operational efficiency | Highly used in long trips; Stress free journey; Sensible mode of travel | Enhanced safety; Increased efficiency; Booking tickets |

### Negative moments

What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?

| Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|
| Damage in sensors; Lose wire connections; No sufficient time interval | Cleanliness; Crowd conditions; High hormonic distortion | Corruption in backend softwares; Data loss; Manufacturing cost of train | Unstable whether; Can't work under adverse conditions; Flexibility | Maintenance of tracks in rural areas; Extension of rail tracks; Totally based on data base |

### Areas of opportunity

How might we make each step better? What ideas do we have? What have others suggested?

| Entice | Enter | Engage | Exit | Extend |
|---|---|---|---|---|
| Automation in break system; Automation in error correction; Infrastructure of railways | Increase train velocity; Automation in commend system; Railway crossing can be improved | Enable artificial intelligence; Sustainability; Initialize cloud computing | Active suspension system; Asset management; Cyber attacks management | Integrated security; Predictive maintenance; Photovoltaic cell |
